

Step-by-Step with Modern Masters

EASTER | Scandinavian Nest

My hubby is from rural South Carolina where by family tradition, he and his siblings created an outdoor Easter “nest” the night before the Easter bunny would arrive, leaving delicious treats. This project can be made inside or outside – on a sideboard, coffee table or out on the patio. Scour your yard for twigs, stones, ferns, or anything earthy, similar to Scandinavian style. Natural and simple.

PRODUCTS NEEDED

- Modern Masters [Metallic Paints in Pearl Black, Matte Oyster, Matte Pewter](#)

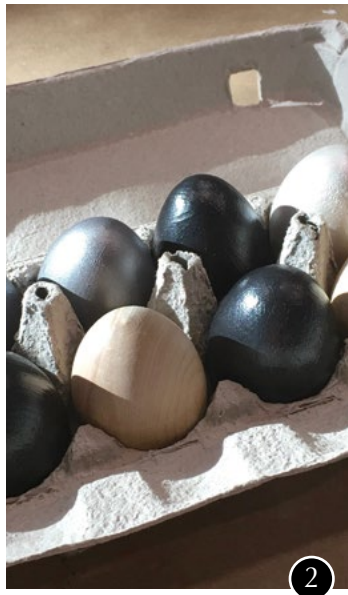

SUPPLIES NEEDED

- Water-based primer
- Large and small plastic or wood Easter eggs
- Paint brushes
- Container to hold large eggs upright
- Paper towels, string or jute, small feathers
- Moss or found objects from your yard
- Container to feature the large egg

Step-by-Step with Modern Masters

EASTER | Scandinavian Nest

BEFORE YOU BEGIN

Prime the eggs using two coats of water-based primer, like Zinsser. Let dry. You can use a large-mouth container to prop large eggs on while working.

PAINT & DECORATE THE EGGS

Paint two coats of Metallic colors on each egg, letting dry completely after each coat.

Add feathers tied on with jute. Arrange a natural-looking outdoor scene that everyone, including the Easter bunny will love. Create your own tradition. This is a perfect project for you and little ones to work on together each year.

You are done!
